

My Website Launched!

Now What?

By TitleTap™

One of the most frequent questions we get when we launch our customers' websites is "Now what do I do?" Use the guide below to learn how to get the most from TitleTap with the least amount of effort.

1) Website Access

If you are a do-it-yourselfer you can request access to your website by emailing support@titletap.com. Our customer success team will create an account for you and provide you with some basic instruction. However, if you'd rather not touch technology, simply email us any updates as they happen and we'll handle it for you!

2) Website Editing, Updates & Undos

We use a few different editors on your website. Here are the training links for each:

- 1) Editing - <https://support.titletap.com/guten> & <https://support.titletap.com/divi>
- 2) Undo Changes - <https://support.titletap.com/undo>

3) Ranking in Google

Ranking on the first page of search engines can range from weeks to months. The good news is that we do everything in our power to increase your odds of getting there. A question for you is what locations and services do you want to be found for? Let us know so we can make sure you are optimized for that.

4) Events, Newsletters, Blog Posts, News...

One of the best ways you can leverage TitleTap is by using our team to execute your marketing plans. Have a new office, or host any events? Have a newsletter or popular article? Do you volunteer? Are you going after a new type of business? Let us know of anything going on in the field so that we can publish it on your website.

5) Our Emails, Blog Posts & Webinars

Staying up-to-date with best practices doesn't have to be time consuming. Stay in the loop by simply reading our emails and blog posts now and in the future. All of our content is training and thus is intended to help you. Read, learn, and ask questions as you have them. We want you to succeed.

6) Social & Reviews Start Once Site is Live

If you purchased our social media and/or reviews products the setup process begins the week that your website goes live. This is because these products can not often be utilized until the website is live. Look out for information from our team or reach out to support@titletap.com to ask about the status.
